

Deliverable: Implementation

Cohort 1, Team 8

Team Members:

Michael Coleman

Finn Done

Charlie Webster

Philip McGowan

Hammad Sami

Tolly Shearman

Eric Vokes

Implemented features:

We have implemented all features outlined in the requirements, including a university-inspired map, a wide variety of visible events preventing the player from progressing, multiple positive and negative events affecting the player's mobility, a variety of fun hidden events which are optional for completion of the game, and a scoreboard showcasing the top player names and scores. A pause menu is also available, which can pause the 5 minute time to escape the maze. No features have been left unimplemented. The game is fully playable and has more hidden events than necessary, as well as useful hints around the map.

Assets Licences:

File Path (Link embedded in title)	Licence
assets/atlas/Player.png assets/atlas/Enemy.png assets/atlas/Interactable.png	https://trislin.itch.io/pixel-lands-dungeons You can: - Use these assets in personal and commercial projects - Modify, edit, or include them in your own games - Use them in both free and paid games You can't: - Resell or redistribute the assets, even if modified

Code Library Licences:

Name: libGDX

URL: <https://libgdx.com/>

License: <https://www.apache.org/licenses/LICENSE-2.0>

Sound effect accreditation:

The following sounds licences state that they are available to use as long as the creator has been credited and the sound has not been modified. No sound effects have been modified and the credits are as follows:

Theplax: crunch.mp3, timtube : evillaugh.mp3, JustInvoke: freeze.mp3, blou27:
door_knock.mp3, Mossy4: beep_boop.mp3, ILOVEMCDONALDS1234:
book_open.mp3, X3nus: soundtrack.mp3, timgormly: powerup.mp3

These licences are suitable for the project as they support open source and commercial development without imposing restrictive copyleft requirements.
